

concentrix accounts payable^o automation

Powered by Xenosoft.

Maintaining thorough, accurate Accounts Payable can make or break your bottom line. Unfortunately, manually processing payments and maintaining records drains internal resources.

Streamline your accounts payable—automatically.

Concentrix Accounts Payable Automation (CAPA) is a secure online solution that streamlines Accounts Payable (AP), giving you the control you need. With set-up costs and monthly fees that are far less than the costs of adding staff and proprietary technologies, you'll quickly realize efficiencies — and an excellent ROI.

Concentrix will consult with your Accounts Payable analysts and make recommendations on how to best incorporate your processes and requirements into your automated solution. On-site user training is available to ensure easy implementation, and, if needed, your company's program can be custom designed for a very reasonable investment.

CONTROL COSTS AND RESOURCES.

Since CAPA is an online image database solution, no OCR software or additional IT resources are required. Data entry becomes a simple scan by an AP associate; the scanned image is automatically categorized, coded, and loaded to your secure database. This information can then be reviewed, tracked, and approved by authorized personnel any time, anywhere through your password protected web interface. Your administrative needs are significantly reduced with the elimination of manual data entry and invoice tracking.

With CAPA there are no licensing fees, no per page fees, no maintenance or professional services fees, no hardware fees, etc. Our competitors also require substantially higher start-up fees than we do and additional fees if you experience any problems. We simply charge a flat per invoice processing fee, so our services are always affordable.

Did you know?

- At 15 invoices an hour, processing 10,000 invoices would require five full time employees (FTE). In this scenario, CAPA could potentially reduce your FTE to two and save your company as much as \$200,000 each year.

- Even in the largest companies, nearly 60% of all invoice transactions are processed manually and the processing costs per invoice ranges from \$3.47 to as high as \$23.63. Imagine what you would save by virtually eliminating the cost of manual invoice processing with CAPA.
- One in every 40 keystrokes produces an uncorrected error. A misplaced decimal point or a dropped zero can be disastrous. Because CAPA means no keystrokes, you will completely avoid these errors.
- On average, lost documents cost \$120 each. With CAPA, scanned images of your invoices are maintained on your secure database — at your fingertips any time you need them.

To streamline your accounts payable, call Concentrix at 1.800.747.0583 today.
