ADM & Staff Augmentation
IT Resources at Your Fingertips

Explore new ways to expand your essential services.

Concentrix Application Development & Maintenance (ADM) and Staff Augmentation deliver user-friendly services by integrating multiple workflows, co-creating applications, and securely accessing client data sources to enable better decision support. We don't provide a one-size-fits-all model. Whether you are a start-up or a large corporation, we help you find the relevant tools and customized features that suit your unique needs.

TRANSITION
Rapid transition capabilities & award winning transition methodology

PROJECT MANAGEMENT
Expert, experienced project management services to minimize transition risk

TIMING
Skillful and efficient management of time-sensitive transition requirements

RECRUITING
Flexible, stand-out, global recruiting capabilities targeted to requirements

RELATIONSHIPS
Relationships maintained with your current internal and external business partners

How do we put IT resources at your fingertips?

We provide talented and skilled resources across countless disciplines, drawn from onshore, nearshore, and offshore talent pools (with no outsourcing commitment) at competitive rates.

For those clients who wish to maintain an existing team or talent base, Concentrix can rebadge your existing employees and convert them to Concentrix employees, working on-site at your location(s).

Depending on your needs, goals, and priorities, we can also source all new employees, recruited and hired by Concentrix, to either work on-site at your location(s); or from a global Concentrix service center that supports your organization.

Looking beyond staff augmentation, Concentrix does more than develop and maintain the tools our clients count on every day—we are always working to keep a step ahead of the industry by acting as an extension to each client's technical support team.

20+
YEARS
of global experience
implementing banking products

10
YEARS
average tenure with
clients around the world

55M
TRANSACTIONS
remittances, P2P, top ups,
bill and salary payments

15M
CUSTOMERS
