Introduction to this Supplier Code of Conduct

As part of our Doing Right DNA and culture, Concentrix is focused on responsible sourcing and ensuring a clean supply chain. Towards this end, this Supplier Code of Conduct sets forth the minimum standards of business conduct that is expected from all Suppliers of Concentrix.

By accepting any Purchase Order from Concentrix, the Supplier (hereinafter referred to as "Supplier") agrees to comply with the principles and provisions in this Supplier Code of Conduct in addition to the terms and conditions set out in the Purchase Order and any Agreement that may be executed between Supplier and Concentrix. The Supplier also agrees to apply these principles to its own supplier relationships and agreements to the extent they support the Supplier's work on behalf of Concentrix.

Finally, the Supplier agrees that Concentrix and/or its representative(s) may conduct reasonable audits and /or inspections of its compliance with this Supplier Code of Conduct and that the Supplier will, on request, provide records to demonstrate compliance with this Supplier Code of Conduct and provide written certification of its compliance, to Concentrix. The Supplier will promptly cure any deficiency identified by the audits and inspections. Non-adherence to this Supplier Code of Conduct may result in termination of business relations by Concentrix with such Supplier, at the sole discretion of Concentrix.

Scope and applicability

This Supplier Code of Conduct shall apply to all Suppliers, sub-contractors, and their partners (Tier 2 Suppliers). The Supplier shall at all times, comply with this Supplier Code of Conduct in all countries in which they operate. It is the responsibility of the Supplier to ensure that its employees, relevant affiliated companies, and subcontractors are informed about the content and comply with the requirements.

Tier 2 Supplier: Means Direct Suppliers, Sub-contractors, or Partners of the Supplier in the supply chain for the products and services provided to Concentrix.

Management Commitment

The Supplier must commit to adopting or establishing a management system designed to ensure compliance with this Supplier Code of Conduct and applicable

laws and regulations consistent with the Universal Declaration of Human Rights and also to undertaking regular identification and mitigation of related operational risks, and facilitation of continuous improvement.

Ethical Conduct

All Suppliers are expected to uphold the highest moral and ethical values in all their business dealings.

Compliance with Law

The Supplier is required to maintain all valid licenses, permits, authorizations or registrations required under applicable laws and regulations and to comply with all applicable laws, rules, and regulations of each and all of the territories where it carries on its business, including without limitation, laws related to employment and labor, anti-discrimination, anti-harassment, the environment, anti-bribery and anti-corruption. The supplier is prohibited from engaging with sanctioned prohibited parties.

Environment, Social & Governance

Suppliers with whom Concentrix has significant spend will be required to obtain a Business Sustainability rating from Ecovadis or an equivalent body (equivalent body will be subject to Concentrix approval). Any supplier who fails to meet the minimum requirements will be required to provide an action plan to improve their rating.

Environment

Concentrix expects its Suppliers to commit to environmental sustainability with a particular focus on Climate, Waste and Ecosystems impacts to work to reduce negative impacts on the natural environment (for example: implementation of best practices to minimize air, water, noise pollution and conservation of natural resources), and taking affirmative steps to protect the environment.

The Supplier shall be required to adhere to all laws in connection with environmental pollution and protection laws applicable to its business and take all steps to measure, monitor and reduce its carbon footprint and impact on the environment. It should also ensure it provides goods/services in a sustainable manner, to help conserve the environment.

In line with the UN Global Compact, Suppliers should support a precautionary approach to environmental challenges. The key to a precautionary approach is prevention rather than remediation, it is more cost-effective and environmentally beneficial to take early action to ensure that environmental damage does not occur than to remediate after the fact.

Similarly, suppliers should encourage the development and diffusion of environmentally friendly technologies. By implementing environmentally friendly technologies and technological innovations a company can reduce the use of raw materials leading to increased efficiency and increased competitiveness whilst making a positive impact on their environment.

Social

The Supplier shall ensure its workplace is free from unlawful harassment and discrimination based on pregnancy, childbirth or related medical conditions, race, religion, creed, color, national origin, or ancestry, physical or mental disability, medical condition, marital status, age, gender, sexual orientation, or any other basis or class protected by applicable law.

Background Check

Prior to engaging with any selected Supplier, Concentrix may choose to conduct or request a background verification check, including but not limited to sanctions checks and credit checks of the Supplier and/or its proprietor/directors.

Failure to clear the background check shall be considered as non-compliance with the terms and conditions of the Supplier Code of Conduct and may result in termination of business relation with Concentrix.
